- Cloud Computing (AWS) - Beginner

Deep Khatri

IT-STUDENT

I am BSc.IT student/ learner currently studying Network as my major field and I want to learn practically and utilize that knowledge for serving the company that I work in.

EXPERIENCE

Computer Hardware Troubleshooting

Guru Computing Service / October, 2021 - Present

Worked as Computer Hardware Troubleshooting in Card level. My job was to identify if the problem of the given device was in Card level i.e. RAM, HDD, wiring, etc., or in circuit board and also it was my job to replace the troubling part.

PROJECTS

Built a Sample Website

It was semester end project where I built a Demo website which was dynamic in nature where admin could edit the website too after logging in. This Demo website was built for a supposed municipality and was hosted it via XAMPP.

Built a Network Architecture for a Company in Packet Tracer

Just a small home project where I built a Network Architecture in Packet Tracer Separating HR department, IT department, Accounting Department, practiced various routing protocol, DHCP configuration and some more beginners stuff.

AWS Cloud Practitioner Lab

Did AWS Cloud Practitioner Lab and launched EC2 instances, AWS IAM & VPC. Just enrolled in this course about 1 months ago, so just a beginner and still learning basic stuff.
